Camellia GROVE
KOMBUCHA

PURE FERMENTED TEA

We believe less is more when it comes to great taste. Camellia Grove Kombucha is simply brewed with organic tea, cane sugar, and live cultures — that's it!

NO ADDED SUGAR

We solely use organic cane sugar for the fermentation process. We skip secondary fermentation and never add sugar for flavor or sweetness—resulting in consistently low sugar Kombucha.

TEA-FORWARD FLAVORS

In lieu of adding flavors or juices, we highlight the natural aromatics in different organic teas. With tea being the largest consumed beverage in the world, we appeal to our fellow tea lovers.

ONE-YEAR SHELF LIFE

In filtering our product and not conducting a secondary fermentation, we can produce a raw Kombucha with a one-year shelf life that still has the benefits of live cultures.

SUSTAINABILITY FOCUS

From our packaging and ingredients to our brewing process, we're committed to minimizing our carbon footprint and prioritizing materials that benefit our planet. We proudly brew with certified organic ingredients.
